Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 27-54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Alaloof (US 6,125,478) in view of Mayhew (US 6,298,487). Alaloof discloses a motorcycle jacket including a plurality of airbags (110,130) to protect against fall and impact that is inflated by electronic means in response the detection risk and danger emitted by sensors, col. 10, lines 41-49. A first of the airbags (110) extends on the front above the chest and a second of the airbags extends on the rear as shown in figure 2G. Furthermore, the inflating device includes pyrotechnics, col. 9, line 1- col. 10, line 65. Sensors are secure to a vehicle such that upon a fall electrical signal are sent to inflate the airbags as shown in figures 6 (A-C). The jacket has an front opening through which the airbag is deployed between flaps (542,544) as shown in figure 11. Additionally, support means includes bands/straps (44) that are positioned about the chest having the electronic means attached thereto as shown in figure 4A. A bottom portion of the device covers a bottom part of the body as shown in figure 4B. Also, the jacket includes sensors (538) therein, col. 11, lines 10-25. However, Alaloof does not show the front opening being offset.

Art Unit: 3765

Mayhew discloses an inflatable garment having an offset curved front opening with fasteners (34,25) extending along front side (15), col. 4, lines 55-56 as shown in figure 2. Further, the garment has inflatable means (39) thereon, col. 5, lines 23-28.

It would have been obvious to one skilled in the art to provide the garment of Alaloof with an offset front opening as taught by Mayhew so that the deployed airbag can substantially protect the chest area of the body or as required for a particular application thereof. Furthermore, it is obvious that the front offset opening of Alaloof is curved as taught by Mayhew in order to conform about the body. In addition, sensors (538) within the garment of Alaloof when viewed with Mayhew can be deployed to protect the user from impact, col. 11, lines 11-26.

Response to Amendment

3. The reply filed on August 29, 2008 have been considered. In view of such, a newly discovered prior art has prompted this office action to be made new-non Final and the arguments are moot.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.
